SUBSURFACE ACOUSTIC IMAGING IN A HIGHLY ATTENUATING MATERIAL

BY

JONATHAN MAMOU

Diploma, Ecole Nationale Supérieure des Télécommunications, Paris, 2000

THESIS

Submitted in partial fulfillment of the requirements
for the degree of Master of Science in Electrical Engineering
in the Graduate College of the
University of Illinois at Urbana-Champaign, 2002

Urbana, Illinois

To my family and my friends.
A ma famille et mes amis.

ACKNOWLEDGMENTS

I would like to thank my research advisor, Professor William D. O'Brien, for his patience, confidence, encouragement, and guidance throughout my research. I am also very grateful to Catherine Frazier and Nail Cadalli for their steady support. I would like to acknowledge Michael Oelze for always being availlable to asnwer my questions. I thank Donald Yuhas and all the team from Industrial Measurements Systems, Inc. for their dedication and help with the project. Finally, I sincerely thank all the students and members of the Bioacoustics Research Laboratory for always being helpful.

I also acknowledge the United States Army (contract DACA42-00-C-0028) for the financial support of the subsurface acoustic imaging project.
